Subject: RE: water sample chart and example DMR for clarification

Thanks Travis. (b)(6)

I have some ideas for you on the DMR sheet and water chart. I'd like to set up time to talk next week and include our support staff who coded the permit for our compliance database, if he's available as well. Can you let me know when might be some good times for you to talk over the phone next week? Then I can send out an invitation. Malenna, if you and or Dave want to be included in this call about sampling/DMRs, (or if anyone else should?) just let me know.

Also, Malenna, I saw your note about reviewing the 2011 application. Maybe we can schedule time to talk sometime next week as well, as I have questions that I don't want to forget to ask you. Thanks!
I hope everyone has a good week/weekend coming up. Talk with you soon.

Subject: water sample chart and example DMR for clarification

Jill,
I have attached a sample water chart for monthly water testing at Leavenworth. Do the samples taken and frequency seem appropriate for permit requirements? Also attached is a sample DMR with added locations to the parameter column for clarification. We discussed on the phone an error in the original comment field and this seemed to be the best way to make sure we are on the same page. In the permit it asks for suspended solids at the pollution abatement pond in two locations on the permit and at different frequency. Some clarification on that would be appreciated. We also had a question with regards to the under bridge suspended comp sample that asks for a monthly average and max but is a comp sample. Does the comp sample need to be taken and analyzed weekly if we are using a comp sampler? Not sure how we would get average and max with one comp sample and the permit states once a month.

Thank You!
